Age Of Discovery: Navigating The Risks And Rewards Of Our New Renaissance

Synopsis

Age of Discovery explores a world on the brink of a new Renaissance and asks: how do we share more widely the benefits of unprecedented progress? How do we endure the inevitable tumult generated by accelerating change? How do we each thrive through this tangled, uncertain time? From gains in health, education, wealth and technology to crises of conflict, disease and mass migration, the similarities between today's world and that of the 15th century are both striking and prophetic: we have been here before. So what must we do to achieve our full potential, individually and altogether, this time around? Will we repeat the glories of the Renaissance, the misery, or both? In Age of Discovery, Ian Goldin and Chris Kutarna show how we can draw courage, wisdom and inspiration from the days of Michelangelo and Leonardo da Vinci in order to fashion our own Golden Age. Whether we're seized by Gutenberg or Zuckerberg, the discovery of the Americas or the rise of China, copperplate etchings or silicon chips, The Bonfire of the Vanities or the destructive fury of ISIS, the spread of syphilis or the Ebola pandemic, such Renaissance moments force humanity to give its best just when the stakes are at their highest. Turning the spotlight on the crises of our time, Age of Discovery shows how we can all define and create a lasting legacy that the world will still celebrate 500 years from now.

Book Information

Audible Audio Edition

Listening Length: 11 hours and 49 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Audible Studios for Bloomsbury

Audible.com Release Date: July 21, 2016

Language: English

ASIN: B01HQQC52Q

Best Sellers Rank: #109 in Books > Audible Audiobooks > Business & Investing > Economics
#237 in Books > Business & Money > Economics > Development & Growth #270 in Books > Business & Money > Marketing & Sales > Consumer Behavior

Customer Reviews

This would be a five star book for the information provided. There were fascinating details provided for the earlier renaissance (1500's in Europe); and some helpful descriptions and explanations of

our present day world The premise of the book that the present day is a new renaissance was well presented and moderately convincing. The book should have ended there. The last sections were agonizingly positive and preachy. There are page after page of unrealistic advice. Most of the advice was hardly original and occasionally contradictory. There were long stretches of tedious reading followed by one or two interesting ideas. It was difficult to finish after such a good start.

In "Age of Discovery", Ian Goldin & Chris Kutarna have given us an engrossing and illuminating account of the connections between the past eras of discovery, the world in which we find ourselves today, and the future towards which, we are hurtling at break-neck speed. A thought-provoking book which will leave us both uneasy, but also hopeful. Much food for thought and discussion. Have You Ever Had a Hunch: The Importance of Creative Thinking

Seldom does any book take you to the places that Age of Discovery does. Not only can and should we learn from the past, but its insights into our future are astounding. This isn't a book that you'll just read one time or place in your library to collect dust. Like a great musical composition, the more times you read it, the fuller your understanding will be of our potential journey we call life.

This book is a must read for anyone wanting to better understand the times we are living through. Viewed with perspective of scholars (easy to read) positioning current times and themes with historical times of a very similar nature. It offers hope but cautions that we are indeed capable of blowing it as well. I've recommended it to at least a dozen people.

Oxford Martin School authored interdisciplinary look at our current historic period? This second Renaissance has the excitement, & benefits beyond the first cultural rebirth. But the risks and unexpected challenges to our being far exceed the first Renaissance. A must read!

Very clearly written and relevant to our times. I am enjoying reading this book very much.

Shows that we are living in the "best of times" and in the "worst of times". It depends on how you look at it. Perspective is important. Lots of facts to demonstrate that we are living in the "best of times"..

Best book I have read since First Break All The Rules. Anybody interested in history, and what could

be in the future, based on that history, will love this book. I give it a five star.
