The new version of the Gazetteer isn't as well detailed as older additions. I had a 12 year old copy that got destroyed in the rain while camping. It had more detail for backwater trout streams and back wood roads.

Glad I got this in preparation for my trip to Wisconsin next month. Great detail; perfect scale.

My husband needed one of these for his job so he puts it to great use.

It's what I use to plan and then navigate for my destination State(s) for each year's Autumn photo-trek. Used in conjunction with a road map, it works fine

Once again DeLorme has put together an extremely valuable resource. Backroads, lakes, trails, all seem to be accounted for. I spend nearly all of my time in Burnett County and could not find anything missing or incorrectly labeled. I use this book as a companion to the Minnesota Atlas. Both are well organized. It helps when weather watches and warnings are issued, the small crossroads and hamlets mentioned on the television are often confusing. These atlases are very helpful. Finally the book is fun to read. Just browsing can teach one much about what is located where in the state. These books are very well done.

I've tried similar map books but always come back to this one. More accurate and more detailed than the rest.

The maps are accurate and resource pages are helpful. Cover needs a flap to close up so pages don't become dog eared.

Yes, it did help us while vacationing in Door County Wisconsin. Thanks!
