College Algebra And Trigonometry

Synopsis

Accessible to students and flexible for instructors, College Algebra and Trigonometry, Sixth Edition, uses the dynamic link between concepts and applications to bring mathematics to life. By incorporating interactive learning techniques, the Aufmann team helps students to better understand concepts, work independently, and obtain greater mathematical fluency. The text also includes technology features to accommodate courses that allow the option of using graphing calculators. Additional program components that support student success include Eduspace tutorial practice, online homework, SMARTHINKING Live Online Tutoring, and Instructional DVDs. The authors' proven Aufmann Interactive Method allows students to try a skill as it is presented in example form. This interaction between the examples and Try Exercises serves as a checkpoint to students as they read the textbook, do their homework, or study a section. In the Sixth Edition, Review Notes are featured more prominently throughout the text to help students recognize the key prerequisite skills needed to understand new concepts.

Richard Aufmann is the lead author of two bestselling developmental math series and a bestselling college algebra and trigonometry series, as well as several derivative math texts. He received a BA in mathematics from the University of California, Irvine, and an MA in mathematics from California State University, Long Beach. Mr. Aufmann taught math, computer science, and physics at Palomar College in California, where he was on the faculty for 28 years. His textbooks are highly recognized

and respected among college mathematics professors. Today, Mr. Aufmann's professional interests include quantitative literacy, the developmental math curriculum, and the impact of technology on curriculum development. Vernon Barker has retired from Palomar College where he was Professor of Mathematics. He is a co-author on the majority of Aufmann texts, including the best-selling developmental paperback series. Richard Nation is Professor of Mathematics at Palomar College. He is the co-author of several Aufmann titles.

Exactly, what i needed and great response & delivery. thanks

Sold as new, arrived heavily taped together, old with a slight smell.

Write the book in a simple easy to learn way and you will have the Diamond you are looking for. Text books are being put together, like making French fries, they all taste the same. The authors forget that a student is trying to learn, not create a whole new system.

My child love the book.

This was exactly what I needed for my course.

Nice textbook perfect condition Thank You!

Some textbooks can be really hard to follow and aren't put together very well. This is one of the few out there that's well thought out, easy to understand, and gives lots and lots of useful examples that make topics clearer and clearer as you go along. It helped a lot to have a good textbook in class.

well used
