Chemistry In Context (WCB Chemistry)

Synopsis

Following in the tradition of the first eight editions, the goal of this successful, issues-based textbook, Chemistry in Context, is to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and significant issues facing science and the world. The non-traditional approach of Chemistry in Context reflects today's technological issues and the chemistry principles within them. Global warming, alternate fuels, nutrition, and genetic engineering are examples of issues that are covered in Chemistry in Context.Â
