Customer Reviews

If you play anything else besides guitar, you will have a tough time using this book. I don't know how I missed the "look inside" feature... but, somehow I did. And, when I got it wanting to play piano, I was somewhat disappointed. That being said, if you know how the songs go, you can get away with using the chords as a base and then singing on top of it. Since the price was pretty good, I'm not going to send it back. But I just didn't get as much use out of the book as I thought I would.

No one understands me like Coldplay. And now I can play till my fingers get cold.

I love this book. It has all the original chords to all of Coldplay's songs, even a couple EPs I'd never listened to. I do wish it had tabs as well, but the chords are good enough. It's especially useful since Chris Martin uses some wonky chords sometimes. Anyway, great book, I totally recommend it.

Awesome

I think this is an excellent idea, fans not only like the music, hear it, sing it, we want to live it too, play it on our home, for us.

I love this book! I wish more songbooks were formatted like this! Easy to read, compact, entire songs on one page for the most part so no page flipping.
