I love Making Words activities because I can do so many different things with them. I also love that

this book is multilevel. I am studying to be a reading specialist and this has been a great resource for the students I've been tutoring as part of my course work. There are many words to make, and you can use the table of contents or index to find words that fit your needs. The only problem I've had so far is that it is pretty tough to get the pages of letter cards to copy correctly - the front and back of the page have to perfectly align on the photocopy, and that is not an easy task unless you wish to tear the pages out of your book and send them through the copier that way. I ended up retyping the letter rows into a Word table and printing those instead. I made the same comment about Making Big Words. This book provides a lot of lesson options in one source.

I use these with all of my Grades 1-3 classrooms to help support phonics instruction. The lessons are clear, the letter cards are great (especially if you copy the vowels in a different color). I only wish there was a suggested grade level - for beginning teachers to use.

Great for struggling readers.

I purchased it for my friend.

Great book to teach phonics. I have used this book for years and just got a new copy because my old one has seen better days.

Great

The book is not new but the skills are still relevant and lessons are planned.

So old school but works so well. I had amazing with my students using this.
